QUESTION: 1
An administrator at Pass.com is configuring WebSphere Portal for use over an SSL-
encrypted link. She wants WebSphere Portal to return URLs that start with 'https://'
instead of 'http://'.

Which of the following is a necessary part of that process?

A. Change the portlet tag library's SSL definition to "true".
B. Find the 'sslEncryptionSetting' field in the 'securitysettings' table and change it to '1'.
C. Edit the web server plugin and change all of WebSphere Portal's 'http://' URLs to 'https://'.
D. In the ConfigService.properties file set "redirect.login.ssl=true"

Answer: D

QUESTION: 2
You work as an administrator at Pass.com. You have installed a portlet from development
and placed it on a page called "Human Resources". Employee Dave cannot see the portlet
on this page with the other portlets when he logs in, but the other employees in his
department can.

From the options below, what could be the problem?

A. The portlet application WAR did not contain the appropriate page information in the
portlet.xml file

B. The portlet was not activated after it was installed

C. The appropriate access rights for this portlet were never given to Dave

D. Dave does not have rights to view the Human Resources page

Answer: C

QUESTION: 3
A company decides to use WebSphere Portal in order to provide all employees with a
single source of information. The users will be asked once to provide a userid and
password in order to reach true single-sign-on for all components.

Which of the following components would NOT be able to participate in a single-sign-on?

A. A POP3-Mailserver

B. A Telnet-based legacy system that is accessed via an Applet and that shall not be changed

C. An Apache-HTTP-Server-based information system that uses BASIC-Auth to authenticate and that shall not be changed

D. A WebSphere Application Server based information system that uses Form-based login, where the Application itself shall not change.

Answer: B

QUESTION: 4
What is the precedence order for setting configuration properties in WebSphere Portal, from highest precedence to lowest precedence?

A. - Properties set in a parent properties file - Properties set on the command line when the configuration task is launched - Properties set in the wpconfig.properties file - Properties set in the XML configuration files themselves

B. - Properties set on the command line when the configuration task is launched - Properties set in a parent properties file - Properties set in the wpconfig.properties file - Properties set in the XML configuration files themselves

C. - Properties set in the wpconfig.properties file - Properties set on the command line when the configuration task is launched - Properties set in a parent properties file - Properties set in the XML configuration files themselves

D. - Properties set in the XML configuration files themselves - Properties set on the command line when the configuration task is launched - Properties set in a parent properties file - Properties set in the wpconfig.properties file

Answer: B

QUESTION: 5
Which of the following statements is true if a portlet is updated by uninstalling and reinstalling the portlet application?

A. Since the portlet data is stored in the database based on the portlet name, uninstalling and reinstalling the portlet will maintain the portlet data and user specific configuration

B. All portlet data including user configuration, saved portlet and portlet application

parameters and portlet page placement are deleted and must be reconfigured

C. User specific configuration data for this portlet will be maintained since it's stored in the WMM database, however, placement of the portlet on pages will have to be reconfigured

D. Since page layout is maintained through the Manage Pages portlet, the portlet will remain on the page until removed, however, the portlet configuration data will be lost

Answer: B

QUESTION: 6
A new theme that unknowingly contains an error is applied as the portal default theme. After applying the theme, the portal displays nothing when a page is loaded.

What is the correct process to recover from the broken theme?

A. Stop WebSphere Portal, Delete the subdirectory for the faulty theme, Start WebSphere portal, log in as an administrator, Navigate to Themes and Skins, Delete the faulty theme

B. Log in as an Administrator, Navigate to Themes and Skins, Change the theme to the WebSphere Portal theme, log out, log back in as the user.

C. Update the Default.jsp with DefaultBackup.jsp, refresh the page

D. Edit Default.jsp and add the tag <wps:debug> at the top of the file, based on the error messages on the page make changes to correct the error, remove <wps:debug> from Default.jsp when errors are corrected

Answer: A

QUESTION: 7
After a new installation of WebSphere Portal, an administrator finds that when users log in with the correct IDs and passwords, they are immediately returned to the login screen. Investigation reveals that the LTPAToken cookie is not being sent to the browser.

Which one of the following is the most likely cause of this behavior?

A. The login.jsp has not been installed properly.
B. The browsers have not been configured to accept cookies.
C. The LTPA token has been blocked by the web server.
D. The LTPA token is not configured for the correct domain.

Answer: D

Which of the following statements about WebSphere Portal templates are true?

A. Configuration templates are essentially parent properties files that are provided with WebSphere Portal and are designed to support specific tasks or sets of tasks.

B. In addition to using the configuration templates provided with WebSphere Portal, people can create their own configuration templates if they find it useful to do so.

C. Configuration templates are used to tailor properties in each machine, and can not be used to set common properties in a number of machines.

D. WebSphere Portal includes configuration templates, which are general purpose properties files. These templates provide the properties needed for many given tasks.

E. WebSphere Portal includes configuration templates, which are condensed, special-purpose properties files. These templates provide only the properties needed for a given task and can also be tailored to a particular type of resource

Answer: A, B, E

QUESTION: 9
An administrator at Pass.com has been given an updated portlet application by the developer. This application contains default parameters for the concrete portlet application.

Which statement best describes what will happen with the parameters that already exist on the server when the portlet is updated using the update option?

A. Since the concrete portlet application is already installed, the existing parameters for that application that are also in the new WAR file are not updated

B. Existing concrete application parameters will be updated with the data from the new WAR file

C. The administrator will be prompted on which parameters should be overwritten to avoid configuration errors

D. If you select the "overwrite parameters" checkbox during the update, these parameters will be updated from the new WAR

Answer: B

QUESTION: 10
<u>Which of these statements are true about the WebSphere Portal graphical installation program?</u>

A. The program requires a Java Runtime Environment (JRE) to run. The installation program checks for the correct level of the JRE and automatically installs it if it does not exist on the machine.

B. The program checks for existing versions of WebSphere Application Server. If a downlevel version of WebSphere Application Server exists, the program will stop and display the logfile automatically to assist with diagnoses

C. The program checks for existence of an LDAP server and WebSphere Application Server, if they do not exist, It will install them automatically.

D. The program checks for existing versions of WebSphere Application Server. If a downlevel version of WebSphere Application Server exists, the WebSphere Application Server installation program can be launched to perform the upgrade to the required version.

E. The program checks for existing versions of WebSphere Application Server. The program requires a Java Runtime Environment (JRE) to run. If it does not exist on the machine, it will display a message, asking for the location of the JRE.

Answer: A, D
