**QUESTION: 1**

Which of the following types of authentication using active credentials are provided in the "credentials" package?

- A. HTTP Form based authentication
- B. Basic authentication
- C. FTP authentication
- D. Java Mail authentication
- E. Lotus Mail authentication

**Answer: A, B, D**

**QUESTION: 2**

Once transcoding is turned on for all portlets, a developer can configure individual portlets to use transcoding through which of the following?

- A. By adding a <config-param> element to the <concrete-portlet> element in the portlet's web.xml file.
- B. By modifying the portlet parameters using Portal Administration.
- C. By adding a <config-param> element to the <concrete-portlet> element in the portlet's portlet.xml file.
- D. By enabling transcoding using the WebSphere Administration Console.

**Answer: B, C**

**QUESTION: 3**

A common problem when accessing the data source from the test environment is that an error about naming is indicated. What is the MOST likely source of the problem?

- A. The database configuration did not include this datasource name.
- B. No data source has been created.
- C. The data source has insufficient client access rights to the database and is failing during the initial connect phase of the access.
- D. The JNDI name of the datasource matches the name used by the client attempting to access it.

**Answer: B**

**QUESTION: 4**

Which of the following is NOT a recommended reason to create a portlet service?

- A. A service should be created when code could be shared across portlet applications.
- B. Services are useful in abstracting model behavior from the controller layer in a MVC design.
- C. Services are used to override existing portal API calls and allow applications to insert their own logic instead.
- D. A service provides a mechanism whereby the implementation can be changed or enhanced transparently to the portlet.
- E. Services can be used when a portlet requires behavior that can not be deployed via a "war" file (such as an EJB client based application).

**Answer: C**

**QUESTION: 5**

When looking for resources of a portlet within its compiled WAR file, which of the following are correct locations to find their corresponding resources?

- A. Compiled files within /WEB-INF/src
- B. Included libraries within /WEB-INF/lib
- C. portal.xml within /META-INF
- D. web.xml within /WEB-INF

**Answer: B, D**

**QUESTION: 6**

A client is using Internet Explorer 5 with property set to English (United States). Which of the following is the first location Portal Server will search for the JSP?

- A. /mypath/html/ie5/myfile.jsp
- B. /mypath/html/en/myfile.jsp
- C. /mypath/html/ie5/en/myfile.jsp
- D. /mypath/html/ie5/en\_US/myfile.jsp

**Answer: D**

**QUESTION: 7**

Please refer to the exhibit to answer this question.

```
<portletAPI:if mode="View" state="Normal">  
  
</portletAPI:if>
```

Why is the code block in the exhibit considered best practice for portlet developers?

- A. The portlet container might not be able to create a valid Portlet Session due to memory constraints.
- B. A portlet may be placed on an anonymous page, and no user session can be created.
- C. This is equivalent to forcing the creation of a PortletSession using the overloaded getPortletSession method that takes no argument.
- D. The code is only required if the portal is configured to support public sessions.

**Answer: B**
