QUESTION: 1

When migrating from an existing standalone CAM to a High Availability CAM solution, what IP address should the administrator configure for the CAM1 service IP address?

Exhibit:

- A. 10.10.10.3
- B. 10.10.10.4
- C. 10.10.10.5 (an unused IP address)
- D. 10.10.10.252 (assigned by the system)

Answer: A

QUESTION: 2 DRAG DROP

You work as a network technician at Pass.com. Your Pass trainee Sandra is curious about the Cisco Clean Access component. You need to match the component with the correct description.

Cisco Clean Access component - Select from these

Normal Login Role	Quarantine Role
Agent Temporary Role	Blocked Role
Authenticated Role	Remediation Role

Definitions

Place Here

Assigned to this role after vulnerabilities are found during a network scan
Assigned to this role until the CCA end user policy requirements are met
Assigned to this role after a successful login

Normal Login Role

QUESTION: 3

Refer to the exhibit. The network represents which type of Cisco Clean Access deployment?

QUESTION: 4

Which three statements are correct about the MARS Global Controller? (Choose three.)

- A. The Global Controller can correlate events from different Local Controllers into a common session.
- B. One Global Controller can support multiple Local Controllers.
- C. Each zone can have one Local Controller.
- D. All Local Controllers events are propagated to the Global Controller for correlations.
- E. The Global Controller and the Local Controllers can be running different MARS OS versions.
- F. Based on a selected Local Controller, incidents on the Global Controller can be viewed.

Answer: B, C, F

QUESTION: 5

A Cisco Secure ACS evaluates a posture validation request using a NAC database that has 10 local policies and one external policy, but the external NAC servers associated with the external policy are not online. The 10 local policies all return security posture tokens (SPTs). The offline external policy is not returned because it is offline at the time of the request. What action will the ACS take?

- A. The ACS will return the redirect URL token until it can validate the security posture.
- B. The ACS will reject the posture validation request.
- C. The ACS will return the valid SPTs with a posture validation of "checkup."
- D. The ACS will check the application posture tokens (APTs) to determine the security posture status before returning a posture token.

Answer: B

QUESTION: 6

A MARS Appliance cannot access certain devices through the default gateway. Troubleshooting has determined that this is a MARS configuration issue. Which additional MARS configuration will be required to correct this issue?

- A. Use the MARS GUI to enable a dynamic routing protocol.

- B. Use the MARS GUI to add a static route.
- C. Use the MARS GUI to configure multiple default gateways.
- D. Use the MARS CLI to enable a dynamic routing protocol.
- E. Use the MARS CLI to add a static route.
- F. Use the MARS CLI to configure multiple default gateways.

Answer: E

QUESTION: 7

What are three benefits in deploying MARS Appliances using the Global and Local Controllers' architecture?
(Choose three.)

- A. A Global Controller can provide a summary of all Local Controllers information (network topologies, incidents, queries, and reports result).
- B. A Global Controller can provide a central point for creating rules and queries, which are applied to multiple Local Controllers simultaneously.
- C. The architecture provides redundancy in case one of the MARS Local Controllers failed within a zone.
- D. Users can seamlessly navigate to any Local Controllers from the Global Controller GUI.
- E. A Global Controller can correlate events from multiple Local Controllers to perform global sessionizations.

Answer: A, B, D
